

## Retail

With Inter Smart Interactive displays, you can turn your shop window into an interactive selling tool – even when your shop is closed! Imagine your customers being able to browse your entire product portfolio at any time of the day or night simply by touching the window. Our shop window SMS system allows your customer to make contact even when your store is closed.

## Corporate

Improve your corporate image by turning your foyer into an interactive PR experience for your clients, suppliers and staff. Allow guests to have full control over the information you want them to access. The latest company news, product information, stock prices, advertising campaigns, etc. are all available to your visitor via a touch of the screen.

## Exhibitions

Our Interactive Exhibition screens will attract and hold customer's attention and at the same time act as another sales assistant. Visitors can now access your entire range of products and solutions simply by touching the screen. The attractive installation will keep your stand fresh and exciting.

Buy the entire system to use as you wish, or hire it in for your specific show dates. The choice is yours.
